

**...want to
give your crop
the
best possible
yield potential?**

EXCEL

**CULTIPACKER
SHIELDED SPRAYERS
RUBBER TYRE ROLLERS**

- Accelerates the breakdown of large clods in field which promotes soil flow therefore trash incorporation
- Follows the contour of soil in bed and hill configuration
- Large heavy duty rings for breaking clods from the top to the bottom of the furrow

Cultipacker

+ **Reduces** the amount of water required to pre-irrigate as the soil is a lot finer resulting in a more even moisture profile: better seed germination

+ **Linkage** on both sides of the implement allows for the machine to be pulled one way for aggressive clod busting and the other way for refining the soil

- A superior weed kill with zero soil disturbance and zero moisture loss
- Heavy duty 6"x4" RHS U-bolted constructed frame for ease of tooling relocation
- Available in sizes from 4 metres to 24 metres
- Optional: tanks, spray droppers, monitors, end tow and folding systems

+ **Optional Guidance System** offering simplicity, dependability, accuracy

+ **Various hoods** available to suit broadacre and irrigation farming practices

Shielded Sprayers

- Can be used for pre-plant and post-plant rolling
- Heavy duty frame
- Simple single bar construction with optional Bob-Cat tyres available

Rubber Tyre Rollers

+ **Firms** the seed bed to create an even moisture profile which:

- improves seed soil contact
- improves moisture retention
- enhances a more even strike
